

Transform your existing devices with ChromeOS Flex

Give everyone in your school the power of a cloud-based OS.

ChromeOS Flex is a secure, cloud-first, easy-to-manage, sustainable and fast operating system for PCs and Macs that's easy to deploy throughout your entire IT estate.

ChromeOS Flex transforms your school's existing devices and provides everyone with a unified, modern teaching and learning experience.

Featuring proactive, built-in security and cloud-based management capabilities, ChromeOS Flex enables you to extend the life of your fleet, which benefits the environment and your school's budget.

Google for Education

Make the most of your existing devices

All your devices – PCs or Macs, new or old – can run ChromeOS Flex for a unified teaching and learning experience.

Reduce your environmental impact

Don't throw away your ageing machines – revitalise old computers and reduce the amount of e-waste you send to landfill.

Reduce risks with proactive security

With Chrome Education Upgrade, you'll get advanced security features and visibility from your central Google Admin console.
