

One-to-one with Equal IT

Technology has become a vital tool for students in their learning journey, at school and at home. A one-to-one programme allows you to move technology out of the ICT suite and directly into the hands of each learner.

A device per pupil ignites creativity, encourages independent thinking and allows personalised learning experiences that each student needs.

Go one-to-one with Equal IT

Parents can now influence how their children use technology in the classroom.

Equal IT is our fully managed, cash-neutral parent partnership programme for one-to-one Chromebook deployments. It ensures students have equal access to the technology they need to support and enhance their learning experience without using a school's IT budget.

With Equal IT, schools have an alternative method to close the IT skills gap in education whilst continuing to develop their technology-based learning.

Reason to go one-to-one

Students and parents

- Improved engagement
- Access learning from anywhere
- Better insight for parents

Teachers

- Break free from traditional teaching
- Bring learning to life
- Less admin, more time
- Great visibility of progress

School leaders

- Learning continuity
- Level the playing field
- Empower students to achieve more
- Affordability

Provide technology equity for all
