

Feel like you've found a cheat code for teaching

Gemini for Google Workspace

AI may be the current buzzword, but it really does mark a paradigm shift in the way we all use technology. The rate of change can seem daunting at times and it can feel like too much effort to learn about AI on top of being a teacher, but for students to leave school well-prepared for careers in the 21st century, it's important that educators can speak the language of a modern classroom.

Google's release of Gemini Education features deep integrations with Google Workspace, so if your school uses Gmail, Docs, Sheets, Slides or Meet then your generative AI journey is about to get even more interesting. As the #1 Google Premier Partner for Education in the UK, our new Trailblazers programme has been created to help you master Gemini in your classroom while speaking your language.

✦ Beta Test • £200

- ✦ 2-month paid trial of Gemini Education (up to 5 users)
- ✦ Online kick-off event to help you hit the ground running (held at the start of each month)
- ✦ Weekly 'office hours' sessions for guidance and to learn new tricks from your peers
- ✦ Free, unique and useful content so you can get more out of genAI than you expected

✦ Trailblazers • Enquire now

- ✦ 12-month Gemini Education or or Gemini Education Premium enablement programme (min. 30 users)
- ✦ Hosted Transformational Planning Workshop to outline your AI goals and success
- ✦ On-site kickoff event with a Gemini Workspace masterclass for each user
- ✦ Your voice in a growing community of early adopter UK schools
